

May 22, 2017

Dear Valued Patient:

I am writing to inform you that I am retiring from the active practice of Outpatient Primary Care Medicine effective July 1, 2017. Unfortunately, I personally, will not be able to continue your care or renew your prescriptions after June 30, 2017.

However, of paramount importance to me in making this decision was the opportunity to afford my patients continued and uninterrupted excellent medical care in my current location with my current phone number. So, I am pleased to announce that I have partnered with The Mollen Clinic (www.mollenclinic.com) to assume my primary care practice. Founded by Dr. Art Mollen, The Mollen Clinic's mission is to provide high quality, accessible health care that always keeps the focus on the patient. I know Dr. Art Mollen and I both share a commitment to provide our patients with the kind of compassionate and innovative medical care that I have provided to you for the last 25 years.

As most of you know, I have a passion for research as it relates to chronic disease and autoimmune disease. So, I am going to devote myself full-time to my internationally recognized clinical research and diagnostic laboratory, Fry Laboratories, LLC and my 501 (c) (3) non-profit organization, Southwest Center for Chronic Disease, Inc. I want to spend the rest of my career working on the advancement of medical treatments and proper diagnoses of chronic, autoimmune and infectious diseases.

I want you to know that the contents of your medical chart are confidential and can be transferred to another physician. If you plan to see a provider other than the providers with The Mollen Clinic, please contact my office for a medical release form and return it signed to my office so that we may transfer your medical records. Otherwise, your current medical records will continue to be on file at The Mollen Clinic. Also, if you are currently taking prescribed medicines, you will have to make an appointment with a Mollen Clinic provider who will make an independent decision regarding the continued use of your medications. You may contact them today to establish care, you do not have to wait until July.

Of course, you are free to seek care elsewhere. If so, I hope you begin looking for another physician, as soon as possible. If you don't know where to begin, I suggest you contact your insurance company who will provide the names of other medical providers in the area accepting new patients.

I have truly and sincerely valued my relationship with you, my patients, more than I can express in words. I thank you for your many years of loyalty and friendship. I extend my best wishes to all of you for your future good health and happiness.

Sincerely,

For Stephen E. Fry, M.S., M.D., P.C.
